1. Every form of life, both big and small:
Energy from the Sun flows through us all.

2. Light, plus 2 H₂O, plus CO₂
Makes C₆H₁₂O₆, plus O₂.

3. Plants take water, plus carbon dioxide
And they make oxygen, and food besides.

4. We're all part of the web of life on Earth,
We're connected to all things from our birth.

Notes:

H₂O = water

CO₂ = carbon dioxide (the gas animals
breathe out)

C₆H₁₂O₆ = sugar

O₂ = oxygen (the gas animals breathe in)
